

Mason Smith

(707) 260-4372 | mason.smith@solutionops.com

Professional Summary

Engineering leader with 9+ years of software engineering experience and nearly 4 years leading distributed engineering teams. Proven track record building and developing teams, improving delivery velocity, and driving platform modernization. Currently serving as technical lead on the largest contract in company history and seeking to return to formal engineering management.

Core Skills

Engineering Leadership: People management, coaching & development, performance management, hiring, team building, technical leadership

Delivery & Strategy: Roadmap planning, Agile delivery, stakeholder management, cross-functional leadership, process improvement

Technical: TypeScript/JavaScript, React, Node.js, C#, PostgreSQL, distributed systems, cloud architecture, CI/CD, AWS/GCP

EXPERIENCE

CBIZ/MSLC – Remote – *Senior Software Engineer (Technical Lead)*

January 2026 – Present

- Serve as technical lead on the largest contract in firm history, directing a cross-functional delivery effort spanning Engineering, Service Delivery, DBA, and external stakeholder teams.
- Set technical direction and mentored engineers through architecture review, code review, and implementation planning, raising delivery quality and consistency across the team.
- Drove modernization of a legacy ASP.NET codebase toward a modern .NET platform, balancing production stability with long-term technical debt reduction.
- Lead risk and release-readiness coordination across dependent teams for a state-agency compliance platform, aligning stakeholders across organizational boundaries.

BackbonePLM (acquired by Bamboo Rose) – Remote –

Software Engineering Manager | March 2022 – December 2025

Senior Software Engineer | October 2021 – March 2022

- Led a distributed engineering team of up to 12 engineers across three continents, with six direct reports.
- Led performance management, coaching, and career development, promoting three engineers while maintaining 100% voluntary retention.
- Improved release cadence from monthly to biweekly while maintaining low regression rates and reliable production delivery.

- Partnered with Product and Design to translate roadmap priorities into technical plans, delivery sequencing, and modernization initiatives.
- Directed modernization of a legacy Java Struts application into React-based micro-frontends, reducing architectural constraints and accelerating feature delivery.
- Led the zero-downtime re-architecture of a legacy background-job system into a Bull/NestJS-based platform, improving throughput and maintainability.
- Established engineering standards and delivery practices that improved consistency across a geographically distributed team.

AbsenceSoft – Remote – Senior Software Engineer

August 2020 – October 2021

- Built a greenfield HR resource-tracking application using React and TypeScript.
- Migrated AngularJS/Razor applications to a standalone React SPA, reducing legacy maintenance costs by 30%.
- Mentored engineers on modern JavaScript/TypeScript practices and helped establish consistent frontend architecture standards.

i4 Insight, Inc – Denver, CO – Software Engineer

October 2019 – August 2020

- Built reusable React mapping components and geospatial visualization features integrating weather and vessel data.
- Refactored a large monolithic frontend into reusable components, improving maintainability, developer experience, and application performance.

NewWave Technologies – Elkridge, MD – Software Developer

January 2018 – October 2019

- Developed reusable React components and Node/MongoDB services for a configurable application-builder platform.
- Implemented RabbitMQ-based service messaging supporting a more modular microservice architecture.

SolutionOps, LLC – Seattle, WA – Owner / Developer

January 2016 – January 2018

- Delivered custom web applications for startups and small businesses across concurrent client engagements.
- Owned client relationships, requirements discovery, technical scoping, delivery planning, and implementation.
